

Secure transport

To whom it may concern

Kriek Helicopters is based in the Barkley West / Kimberley region but also have access to helicopters in Cape Town, Bloemfontein, Upington, Johannesburg, East-London, Botswana and Zambia. The company specializes in a wide variety of helicopter operations, one of them being secure transport. The transport of precious assets can be done safely by helicopter and flight times cannot be predicted by anyone, as the base is situated outside controlled airspace. Assets and representatives can be flown from secure mining areas to secure airports or tender houses.

The cost involved is low in comparison as insurance premiums are lower when assets are transported by air. The other cost advantage is that high performance piston engine helicopters are used to keep the flying cost as low as possible, while still ensuring fast and safe flights. We can also supply the following services: Executive transport, game counts & surveys, game capture and charter flights.

The company utilizes highly experienced commercial pilots and have an approved air service licence issued by the Department of Transport and operates under licence numbers: G902D & N901D. The company is in possession of an operating certificate issued by SACAA (South African Civil Aviation Authority). Please do not hesitate to contact us if you require further information or if you would like to book a meeting with us.

Yours truly
Johann Kriek
